

RECTIFIED POWER CORDS

Rectified power cords are a simple and cost effective way to provide 110 Volts DC to continuous duty electromagnets. Simply select the electromagnet you wish to use from the tables below to determine which power cord should be used with the magnet. Now you can connect the magnet to the cord and plug the cord into any switched 120 VAC outlet. Plug must be used as part of the cord, hard-wired versions are not available. Circuit breaker protection of the outlet is also required.

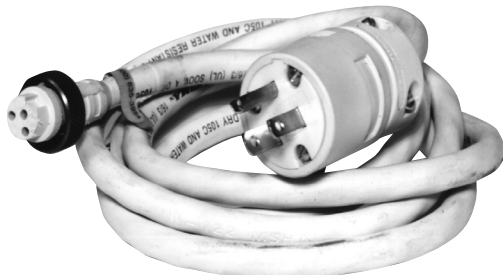

RCM-04552

**110 VOLT DC
CONTINUOUS
DUTY**

THE RCM-04552 PLUGS DIRECTLY INTO
THE FOLLOWING HEAVY DUTY MODELS:

- EM-2545M-110C
- EM-3060M-110C
- DCA-350M-110C
- DCA-400M-110C
- DCA-500M-110C
- DCA-600M-110C

RCS-03207

**110 VOLT DC
CONTINUOUS
DUTY**

THE RCS-03207 PLUGS DIRECTLY INTO
THE FOLLOWING HEAVY DUTY MODELS:

- EM-4080S-110C
- ES-4080S-110C
- EMS-4080S-110C
- EM-6012S-110C
- DCA-800S-110C
- DCA-1000S-110C
